

# *Earth and Moon*

*Earth is a planet*

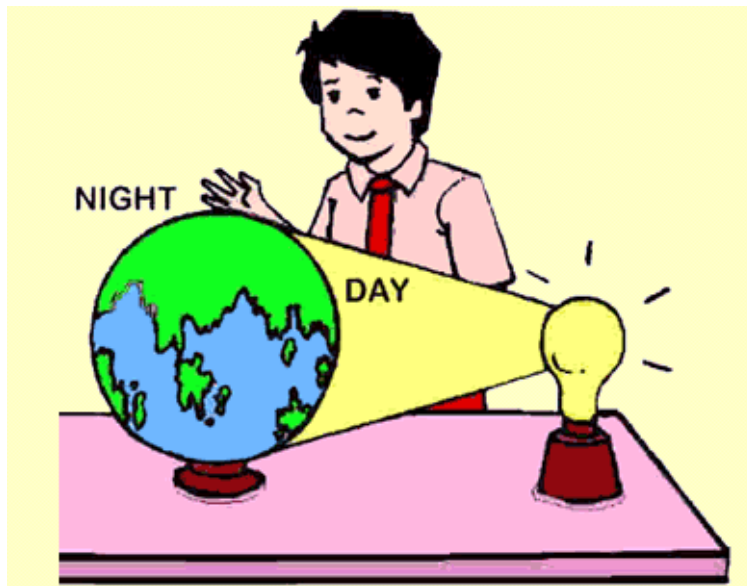

*Moon is a satellite*

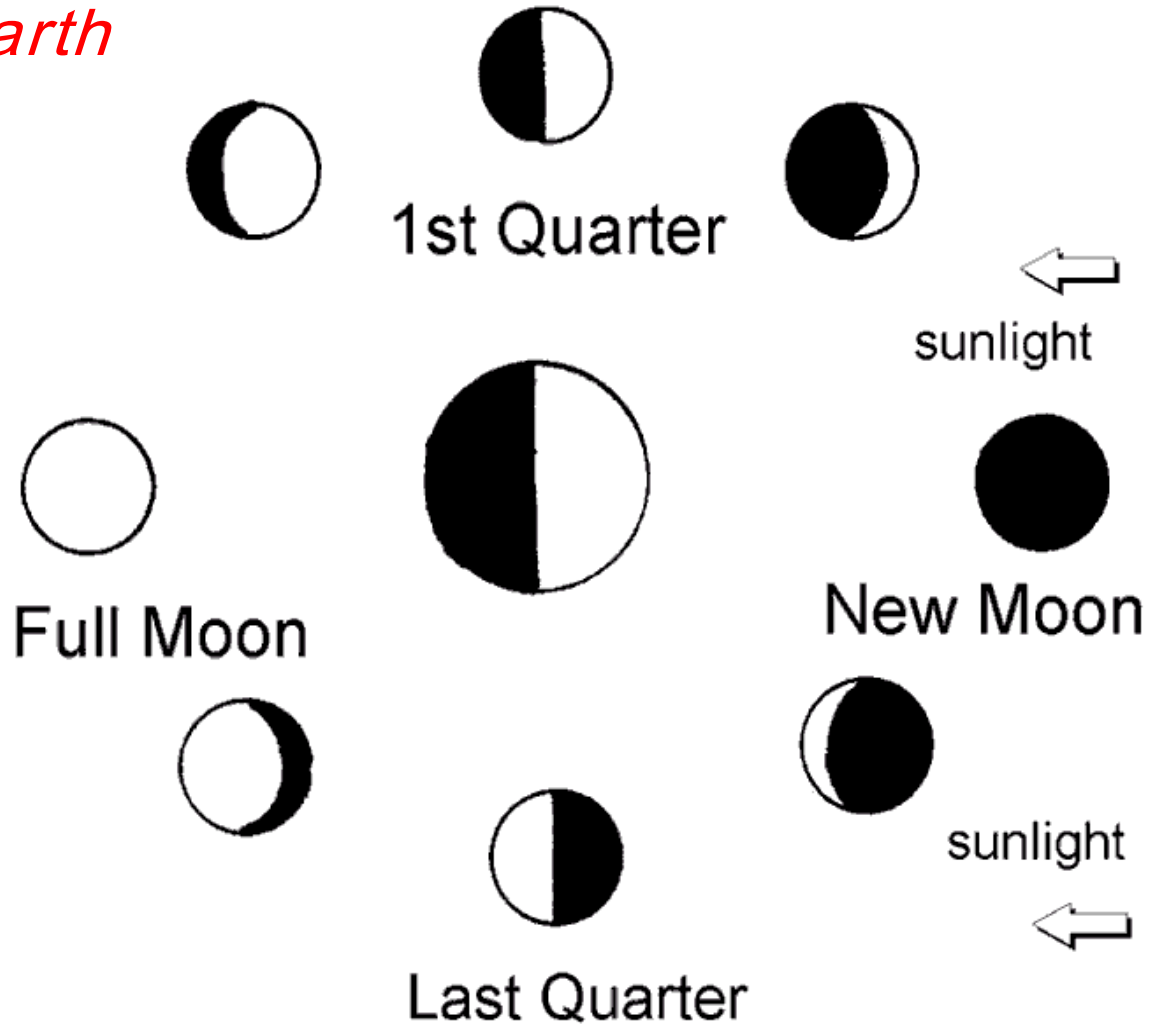

*The Earth  
rotates on its axis*

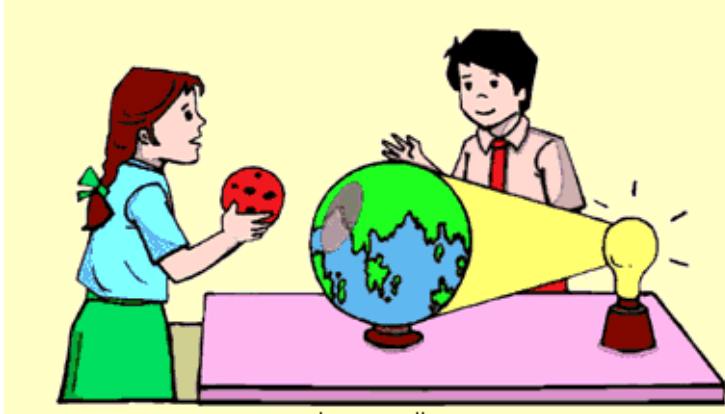

*The Moon rotates  
on its axis*

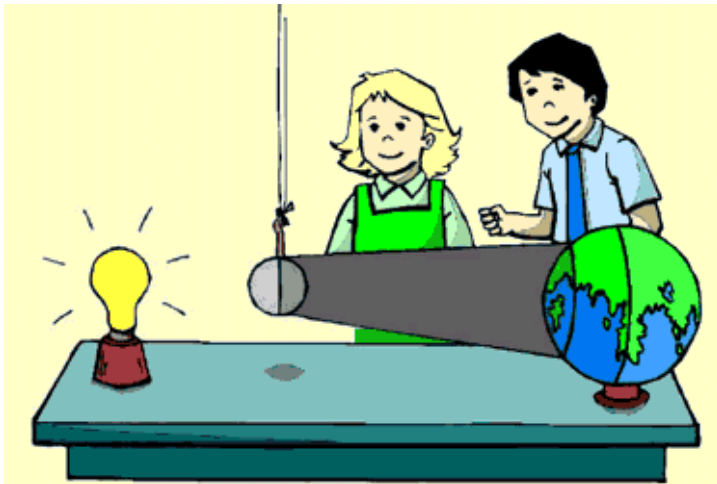

*The Moon revolves around the Earth*

*causing different phases of the Moon*

*Lunar Eclipse,  
Earth between Sun  
and Moon*

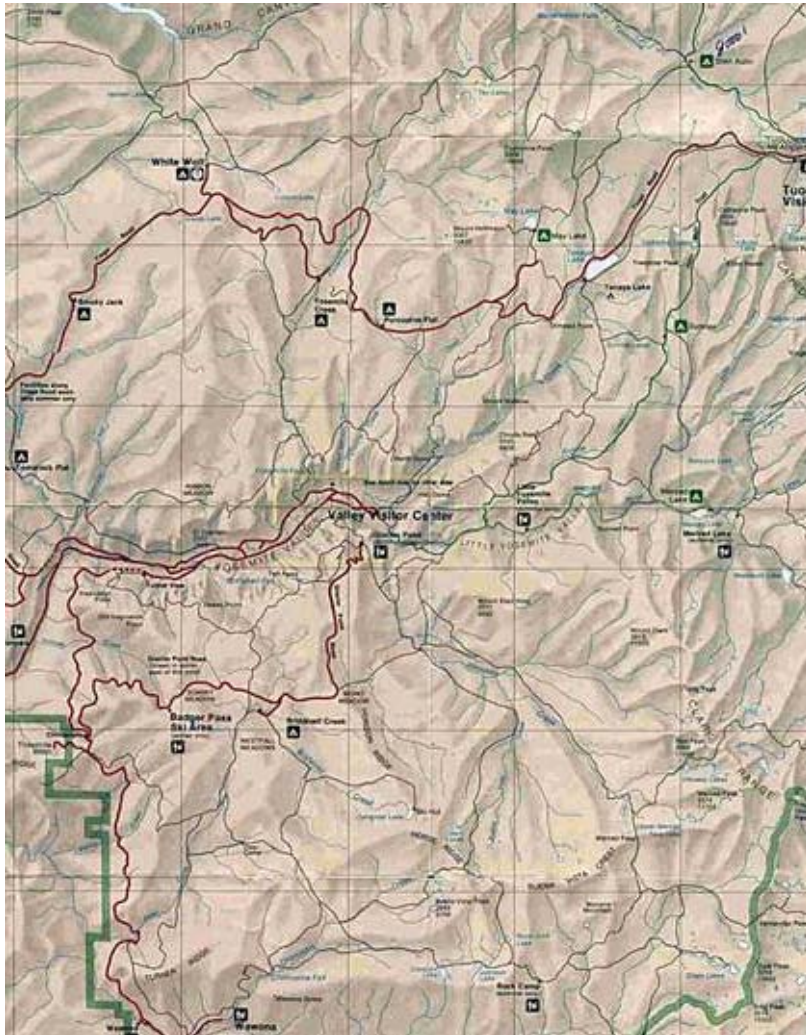

*Solar Eclipse,  
Moon between Sun  
and Earth*

*lunar surface*

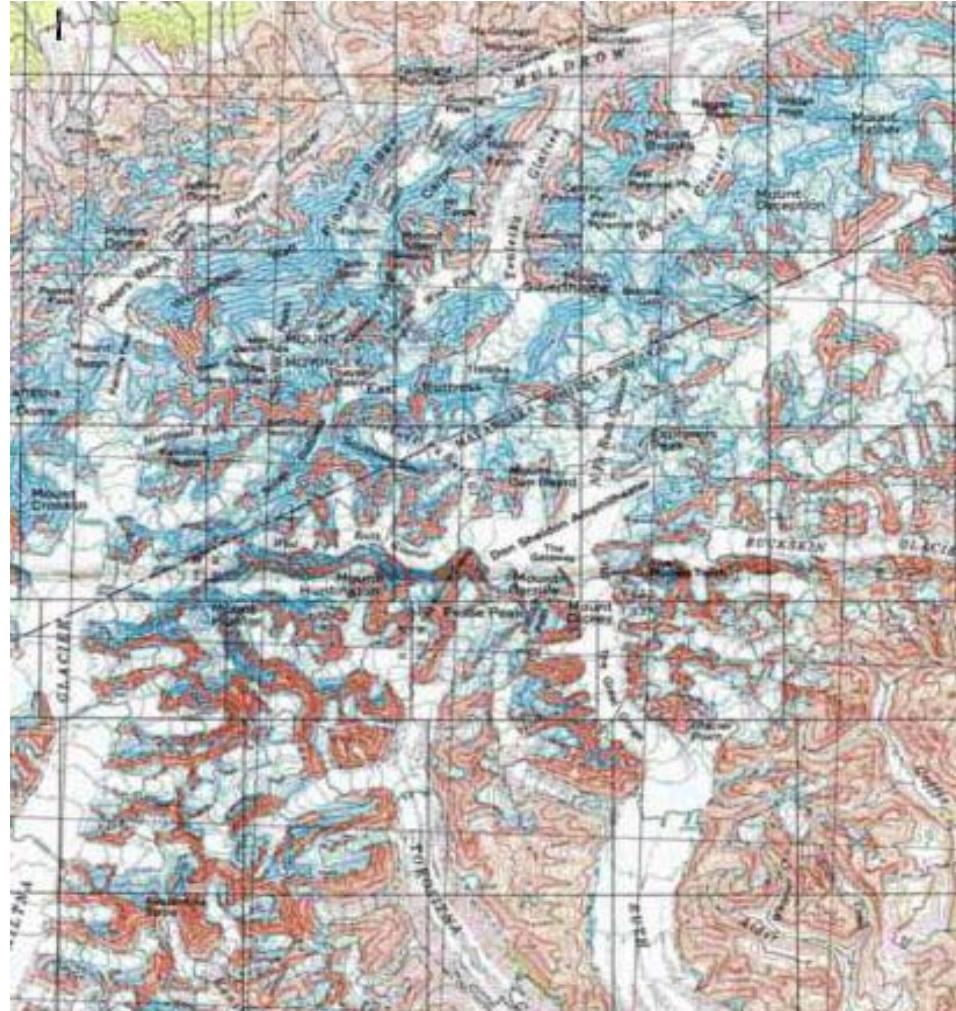

*The Earth is different from most planets  
because of landforms formed by water*

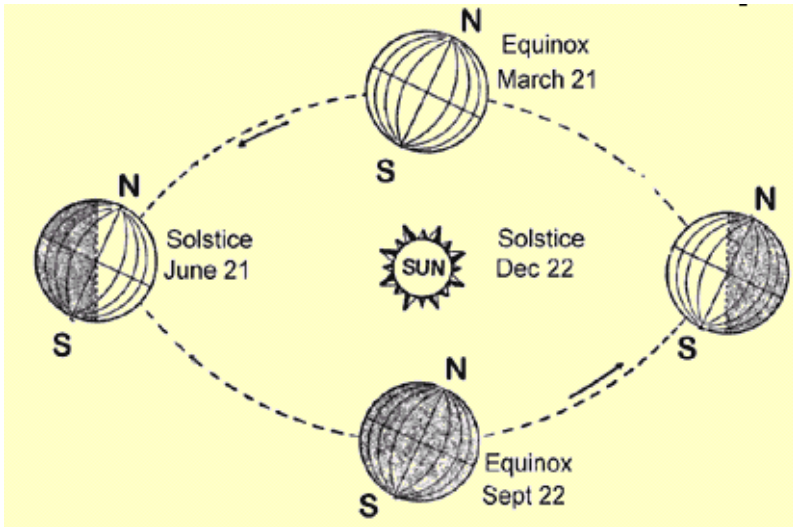

*Streams and rivers cause "V" shape valleys*

*Glacials cause "U" shaped valleys.*

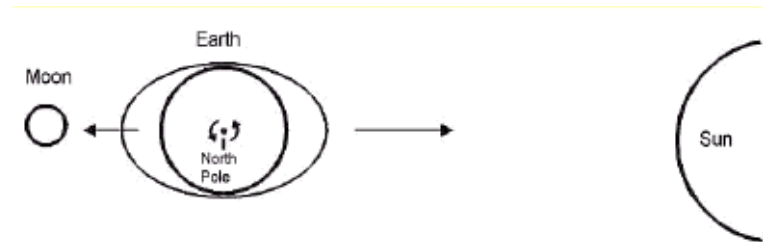

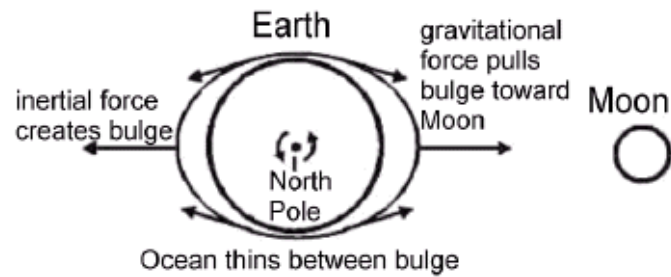

*Seasons are caused by the quality of light due to the tilting of the Earth's axis*

# *Moon and Earth Attract each other*

## *Spring tides (high)*

## *Neap tides (low)*
